HAPPY HOLIDAYS !!!

by John Mumma, Regional Forester

At this special time of year, I want to wish each of you the happiest of holidays. I hope you can be with your families, your loved ones, and your friends this holiday season.

Thanks to each of you for doing your part to help this Region meet its many goals and obligations this past year. I realize that the stresses and frustrations of just doing business in these days of change can really put us to the test, and I'm very proud of the way I've seen so many individuals and units respond. For example, the numerous cost-share efforts that you initiated have made many projects possible that we couldn't have done alone. The wonderful progress

we've made in this Region to accommodate disadvantaged people in our recreation areas is something else we can be very proud of.

I see a lot of wonderfully positive attitudes out there. I see terrific, innovative ideas surfacing from some very creative people. Coupling that with a lot of good, hard work and perseverance, you have managed to

overcome many obstacles and rise to the occasion.

I truly look forward to entering a new year and a new decade with this Region One Team. We'll have challenges, but I feel confident that working together as a team, we can respond in the professional way we take pride in.

I wish all of you a very happy holiday season and a terrific year to come.

John W. Mumma

When "VMS" Meets "ASQ"

by Rae Ellen Moore, Landscape Architect

"Human habitat management is another way to talk about visual resource management," Corky Sanborn told the training participants.

The Gallatin NF hosted a Visual Resource Management workshop October 10-12. Region One landscape architects Corky Sanborn (Idaho Panhandle NF), Bo Nielsen (Deerlodge NF), Ken Keefe (Beaverhead NF), and Pat Thomas (Flathead NF) demonstrated how the Visual Management System (VMS) can assist with Allowable Sale Quantity (ASQ) goals. When VMS meets ASQ, both can win, and the public can still enjoy their scenery.

Landscape architects everywhere are involved in the design of all aspects of the built and natural environments — design which respects both human needs and the needs of the environment. Working within the framework of the VMS, landscape architects can offer creative ways to do business so the Forest Service can succeed in today's environmentally conscious world.

But with only a handful of landscape architects in the Region to apply the VMS, some Forests now use para-professional visual resource advocates on the Districts to provide a wider base of

support to the timber management program.

Under this concept selected individuals become para-professionals and handle most of the visual resource analysis, working directly with a landscape architect on critical or sensitive projects.

Scenery in Region One is increasingly the stage for epic novels, films, and travel articles — enjoyed by an international audience. And recent research reveals that 75-80% of vacationers in Montana come for the scenery. As timber management activities move into the "front country" to meet resource targets, these activities may become more visible to our customers. Knowledge of the VMS gives field-going personnel additional tools for meeting goals while decreasing the likelihood of controversy.

Workshop exercises led students through the VMS and the steps needed to determine Visual Quality Objectives (VQOs). Students also learned to describe a landscape's *existing* visual condition and the *desired future condition*, or character (the landscape character to be created or maintained over time, in

Workshop students applying their landscape management skills to a project area. Photo by Bo Nielsen.

keeping with Forest Plan direction).

On the last day of the workshop, students took to the field and applied their new landscape management skills to an actual project area. They mapped "seen" areas; discussed methods of "borrowing" from the form, line, color and texture of adjacent terrain; and wrote visual analyses.

Each student will work on a real project at his/her home station as the final phase of the training.

If you missed this opportunity, watch for the 1990 training session. In the meantime, your Forest may have a self-study course in basic Visual Resource Management.

Helena National Forest

On October 19, Helena NF planted a memorial tree, dedicating it "In memory of all wildland firefighters who lost their lives in the line of duty in the suppression of forest fires." The ceremony, led by Forest Supervisor Ernie Nunn, took place at Centennial Park in Helena. Guest speakers were Wayne Williams, 13-year veteran smokejumper and public relations specialist for the Missoula Smokejumper Base; and Mike Davis, aviation officer for the Northern Region.

Memorial to Firefighters

by Lorraine Parrish, Public Affairs Specialist

There were representatives from Montana Dept. of State Lands, the Bureau of Land Management, Yellowstone National Park, the City of Helena, Helena Chamber of Commerce, and from Max Baucus's and Pat Williams' offices. The Gallatin, Lewis and Clark, and Beaverhead NFs were represented, as well

Lorraine Parrish, public affairs specialist, and Larry Cole, forester, Helena Ranger District, plant a memorial tree.

Beaverhead National Forest

"On The Air"

by Jack de Golla, Public Affairs Officer

Debbie Jones of Wisdom Ranger District, and Harriet McKnight, of Wise River, are the new "voices" of the Beaverhead NF on station KBOW, 550 AM, in Butte. Debbie and Harriet alternate giving weekly reports on activities on the west side of the Forest, an area frequented by many people in Butte and other areas served by the radio station.

Connie Kenney, the station's news director, said many groups approach her to do such weekly spots, but most run out of enthusiasm after a few weeks. Between Debbie, Harriet, and third-string backup, Jack de Golla, Forest public affairs officer, there should be an unending stream of 45-second, weekly news spots. Tune in Wednesdays for the 9:30 a.m.

Debbie Jones (left) and Harriet McKnight report on Forest activities over radio station KBOW.

broadcast. Ms. Kenney also uses excerpts from the radio spots in her news reports throughout the rest of the week.

Lolo National Forest

Skip Hegman Receives Award

by Angela Follingstad, Personnel Specialist

Bob Meuchel (right) presents Skip Hegman with the Vernon Valach Memorial Award.

Charles "Skip" Hegman received the Vernon Valach Memorial Award on November 16, naming him the Lolo NF's outstanding technician for 1989. The award was established by the Valach family in memory of Vernon Valach, a forestry technician on Superior District who was killed in an automobile accident in 1983. Special recognition is given to an outstanding technician each year.

Skip Hegman's expertise in geology was recognized as a significant contribution throughout the Northern and Rocky Mountain Regions of the Forest Service. He has served on details at the Lolo NF supervisor's office and Toiyabe NF; and is recognized for his contributions to ID teams. While working for the Missoula/Ninemile/Seeley Lake Engineering Zone, Hegman developed an inventory of aggregate sources for use in road design and construction, and has classified many proposed road locations. Hegman earned the award through his high caliber performance, pride in his work, and his ability to work well in a variety of situations.

In Memoriam

Fleming K. (Red) Stewart, former chief of the land ownership adjustment branch in the Regional Office, died December 6 at 93. Stewart attended the University of Montana, and was first employed by the Forest Service in 1915.

He worked as a forest guard, field assistant, forest ranger, surveyor, draftsman, and chief surveyor before moving into the land ownership branch. Stewart retired in 1963 after 46 years with the Forest Service. He was well-known for

his knowledge of property valuation and land adjustment and was frequently commended by Chief Ed Cliff for his work in the Washington Office.

Forest Designates Special Hunting Area for Handicapped

by Madelyn Kempf, Acting Public Affairs Officer

A commitment to customer service prompted Flathead NF personnel to designate the Nine Mile Loop Road area on Glacier View District as a special hunting area for hunters with disabilities.

Located just off the North Fork Road, approximately 7 miles from Columbia Falls, this area is usually closed to motorized access. Under the new designation, the usually closed gate is now open, allowing hunters with disabilities motorized access. Although the gate is open, a large sign—donated in part by Baumbach's Signs of Kalispell—clearly states: "Handicapped hunting area, Road 316. Open to vehicles transporting handicapped/disabled hunters only..."

Glacier View District personnel monitor the area twice a week and so far no one has been cited for illegal use. A counter set up on the road monitors traffic. The disabled hunters also monitor the area and report violations if any occur. District personnel worked closely with the Montana State Department of Fish, Wildlife and Parks on regulations for the area.

The Nine-Mile Loop Road fits all the criteria for use as a hunting area for the disabled: close proximity to town; a variety of terrain—meadows, marshes, open ridges, brushy draws; and virtually no steep mountain slopes. Hunters could be easily located if they should encounter problems. The road system forms a convenient loop and several side roads offer a little variety.

Selectively logged or clearcut units dot the area providing not only excellent forage for wildlife, but convenient openings where hunters can spot game. The backside of the area is more heavily timbered.

District Road Manager Clarence Taber became interested in securing an easily accessible hunting area for the handicapped about a year ago while working on the District's travel planning process.

Taber presented his idea for a handicapped hunting area to Glacier View District Ranger Tom Hope and received enthusiastic support.

Finally, through the dedicated efforts of Glacier View District personnel, and engineering systems management, this unique project became a reality. The result is an area that provides an excellent recreational opportunity for a special group of forest users.

Flathead National Forest

Easy-Access Firewood

by Madelyn Kempf, Acting Public Affairs Officer

To meet the needs of a variety of Forest users, Glacier View Ranger District has opened a special 3-acre area for disabled firewood gatherers just 2 1/2 miles north of Columbia Falls on Road #10815 in the Cedar Lake Cross Country Ski Area.

The area, just off the North Fork Road, provides Forest users with disabilities an easy ac-

cess to a stand of bug killed lodgepole pine. Access is allowed only to those who have purchased a Forest Service Personal Use Permit and obtained a special wood permit for disabled people from Glacier View Ranger District.

Glacier View Ranger District Receptionist Ed Cumming was instrumental in getting this area set aside. "Many local people are using the area who don't ordinarily cut firewood because of health problems," said Cumming. "This area, with the trees readily accessible, makes it easy for them to gather a small amount of firewood and enjoy wood gathering as a recreational opportunity."

Since public response is so favorable, another area is in the planning stages for next year.

Ed Cumming, Information receptionist at Glacier View District, developed the idea for the special firewood gathering area.

Dramatic Rescue Leads to Helicopter First

by Jack de Golla, Public Affairs Officer

Tragedy made history in the annals of Region One's use of helicopters. On Sunday, September 3, 1989, Ellen Murphy Kolesar, 36, of Bozeman, fell 100 feet onto rocks near Tweedy Mountain, in the Beaverhead NF.

The following day, after Beaverhead Search and Rescue personnel had stabilized the critically injured woman, a National Park Service helicopter from West Yellowstone arrived on the scene. It carried two smokejumpers, Jig Parker and Dave Hart. They loaded Mrs. Kolesar onto a sling, and ferried her to another rescue chopper from Malmstrom Air Force Base. The larger ship took her to the hospital in Butte.

Mrs. Kolesar had been taking photographs of the scenic rugged terrain near Tweedy Mountain, when she lost her footing and fell. According to the last report, she had survived, but suffered severe, long-lasting injuries. That she is alive at all is a tribute to her rescuers, including two history-making smokejumpers.

News Briefs

Logo Contest

A contest is being held to design a logo for the spring Fire Management Officers' Meeting. The meeting's theme is "Making the Best Better Through Technology and Diversity." If you have an idea for a logo and want to enter this contest, contact Wayne Williams, Aerial Fire Depot (329-3814; FTS 585-3814) or Kim Delgado, Regional Office (329-3438; FTS 585-3438). Besides having his or her art displayed, the winner will have a choice of a fishing trip on Flathead Lake or a guided hiking trip in Glacier National Park, courtesy of Dave Bunnell, Flathead NF.

Kudos for the Pack String

In a letter to Regional Forester John Mumma, Boise NF Supervisor Dave Rittersbacher praised the Montana Centennial Pack String for its appearance in the Boise Holiday Parade November 18. He claimed it as the "Idaho Centennial Pack String," and said "We could not have asked for more positive, more professional representation for the Forest Service."

Firefighters

continued from page 2

as many employees from the Helena NF.

Wayne Williams acknowledged the thirteen smokejumpers who gave their lives during the Mann Gulch Fire in 1949, in the area that is now the Gates of the Mountain Wilderness. He said that much has been learned from their sacrifice which resulted in making the smokejumper program safer, and noted that since that time over 300,000 jumps have been made, resulting in only two deaths.

Mike Davis gave recognition to the aviation program throughout the Forest Service, especially noting the progression during the past years since the 1940's and remembering the sacrifices made in aircraft accidents in the suppression of forest fires.

Northern Region News Editorial Policy

The *Northern Region News* is published by the Northern Region Information Office for employees and retirees. Articles will feature Forest Service employees and retirees involved in Forest Service activities and projects. The *Northern Region News* provides an opportunity for you to share ideas and projects, and to highlight success.

Articles should be concise and timely. Photos should be black and white, glossy prints if possible. Color prints may be used if contrast is good. All articles are subject to editing, and may not be used if outdated, inappropriate, or if space does not permit.

Send articles to D.Riebe:R01A on the Data General if possible. They can then be transferred directly to the Macintosh computer, on which the *Northern Region News* is compiled. Articles can also be sent to Deanna Riebe, Northern Region Information Office, P.O. Box 7669, Missoula, MT 59807.

Retirements

Jim Hocking, health and safety manager for Region One, will retire in December after 26 years of Federal service. Hocking worked on the Bitterroot and Clearwater NFs before transferring to the Regional Office in 1975.

Glenn Hacker, architect for the Regional Office in Missoula, retired in October after 26 years with the Forest Service. He worked for 13 years for private architects before beginning with the Regional Office in 1963.

Jim Webb, associate deputy chief in the Washington Office, will retire at the end of the year after 34 years of Federal service. Webb was director of personnel management in Region One from 1967-73.

Record Turnout for Annual Retirees' Meeting

More than 80 people attended Regional Forester John Mumma's annual meeting for retirees December 6. Directors, forest supervisors, and other staff were on hand to visit with the retirees, during a luncheon held at Quality Inn in Missoula. Several presentations were made to update retirees on current programs, as well as some of the issues and concerns in the Region. For example, Director of TCFPM Dave Spores explained the new old-growth policy, recently released from the Washington Office; and Doug Glevanik of R.O Planning gave an update on the Yaak lawsuit.

Bob Milodragovich, chairman of a committee reviewing the writing of Region One's history, reported on the progress of that committee. John Mumma and Director of Information Beth Horn then presented committee members with awards for their work.

Retiree Gene Hawkes talked about a group he has formed in the Bozeman area which is dealing successfully with the problem of access to public lands, and of public rights-of-way being closed. Retiree Ed Hileman reported on the new Forest service Museum project, of which he is one of 19

Photo by Deanna Riebe

directors. He noted that the group is looking for both members and artifacts. The museum at Fort Missoula will act as custodian for artifacts donated until the new museum is built.
